

our sustainability approach.

APA Group is one of Australia's largest companies – in fact we are Australia's number one gas infrastructure business and as such are a leader within the energy industry, playing a key role in defining and delivering the future of Australian energy.

Our reputation is important to us as we strongly believe that how we conduct our operations is key to growing a sustainable business. Infrastructure and energy needs are long term investments as is the investment we make in our five stakeholder groups – investors, customers, the environment, communities and our employees. Our vision is to connect Australia to its energy future and to do this we must connect with and respect our stakeholders.

The FY2016 Sustainability Report details APA's financial year performance against sustainability actions for FY2016, as well as outlining the material economic, environmental and social sustainability risks and how APA mitigates those risks.

At APA we are guided by 'Our Values' which anchor how we act and how we make decisions. We reach for the STARS quite literally –
